

A joint project between Parker Water & Sanitation District and Meridian Metropolitan District

About the Project:

The Meridian Metropolitan District (Meridian) is committed to providing a reliable and resilient water supply to our customers. The Parker Water & Sanitation District (Parker) and Meridian are installing a new pipeline and metering vault along Ridgeway Parkway. This pipeline will “interconnect” Parker’s and Meridian’s potable water distribution systems. This Interconnect project will improve the reliability of these distribution systems in the event of an emergency.

Construction Information:

Construction will start on February 19, 2024, and is proposed to finish in May 2024. Construction will take place Monday through Friday, there will be no work scheduled on the weekends. For the duration of the project the acceleration lane on Ridgeway Parkway to the west of Hillsboro Street and the sidewalk along Ridgeway Parkway will be closed. For a period during construction the T-Intersection of Hillsboro Street and Ridgeway Parkway will be closed. Once the pipeline and metering vault have been installed landscaping restoration and installation of a new sidewalk will be completed. A map of the project area is provided below.
